

Liverpool Community College
Duke Street, Liverpool

Description

Opened in August 2003, the Duke Street branch of Liverpool Community College is home to students studying for a career in the service industries. It accommodates over 3,100 students.

Nationwide Interiors were involved in the extensive refurbishment of the College, transforming some of the older classrooms into contemporary salons and manicure suites.

Our works consisted of sound proofed suspended ceilings, dry-lining partitions, plastered bulkheads, door sets & ironmongery and the supply and installation of various FF&E such as dry-wipe boards, mirrors, coat hooks and lockers.

The work was programmed to be carried out during the summer recess, which led to an extremely tight deadline in which to complete, not only our original package, but the additional work awarded to us mid programme, a task we completed successfully.
