

Project: Albion Square Offices
Nuclear Decommissioning Authority, Whitehaven
Client: Morgan Sindall / Role: Joinery Fit-Out
Value: £490'000.00

**MORGAN
SINDALL**

This facility is a stunning 'future proof' 100,000sq ft. BREEAM excellent office development which was designed to meet exacting tenant requirements as well as institutional standards. The building also perform a transformational role within the wider regeneration of Whitehaven.

The development provides a highly secure, flexible, sustainable workplace with the fit out developed to support building users with the transition from existing facilities and ensure an appropriate, comfortable and productive workplace is achieved.

Within these new offices we supplied and installed not only our more standard Joinery items such as Doors, Frames, Architraves, Windowboards, Ironmongery sets, W.C. Cubicles & matching I.P.S. Panels & Vanity Units, but we also supplied and installed a large amount of featured cladding in Siberian Larch to the light and airy Atrium as shown in picture 3. We completed with our works with a large amount of very high specification internal glazed Partitioning systems and also a number of Kitchen break-out areas for the incoming Staff.
