

Stopford House
Stockport

Description

In early 2011, Nationwide Interiors secured a prestigious £300,000 refurbishment project with Stockport Metropolitan Borough Council. The project brief was to refurbish Stopford House, one of Stockport's most iconic council buildings. Due to the quality of work undertaken and our successful relationship with the client, we were awarded further project phases taking the contract value to over £5,000,000.

Our scope of works consisted of the supply and installation of paint grade door-sets and ironmongery, skirting boards, window boards, architraves, partitions and glazed integral screens, suspended ceilings, soft and hard flooring, IPS panelling, WC cubicles and vanity units, and all associated FF&E.

All of the works were carried out during normal working hours. Staff were decanted efficiently ensuring minimal disruption to the work place.
