

**Ballamona Hospital
Isle of Man**

Description

Nationwide Interiors were instructed by the Manx government to carry out refurbishment works on the Ballamona Hospital, a dated mental health institute that now makes up part of the ultra-modern Nobles Hospital.

Our scope of works included the supply and installation of factory finished glazed maple screens, fire screens and hatches, maple veneered, laminated and paint grade door sets with ironmongery and specialist X-Ray rated doors.

Nationwide Interiors were also responsible for fire testing and certifying all of the screens.
