

Exchange Quay 2 Office Building
Salford Quays

Description

Our reputation for producing high quality commercial fit – out solutions led to us being commissioned by BAM Construction to work on this prestigious, mixed use development, at Salford Quays. Our works included very high specification ash door sets & skirting boards, fitted to the communal reception and office areas, and painted door sets and MDF sundries, installed in the inner office areas.

Our high level of performance on site, during the joinery installations, saw Nationwide Interiors being awarded further work, with the supply and installation of ironmongery sets, window boards, stair strings & handrails, IPS panelling, W.C. cubicles, vanity units, mirrors, bench seating and lockers to the wet rooms and shower areas.

We also installed the kitchen units throughout the building and furniture into the security suite in the main atrium.
