

No. 1 King Street  
Manchester

**Description**

Nationwide Interiors secured a project at one of the most prestigious addresses in Manchester's central shopping areas, Number 1 King Street. One of the many projects we have completed working directly for an end user client. Nationwide Interiors managed the complete interior fit-out and installation of external windows of this Grade II listed building.

Overcoming the logistics of operating in such a confined space, whilst ensuring the client maintained a "business as usual" service was a real challenge. We managed this efficiently and smoothly due to our excellent communication abilities, and the well organised collaboration of our experienced on site team.

Due to this project being completed to a high specification, on time and under budget, this contract led to Nationwide Interiors securing the refurbishment contracts for 3 further office facilities for this client.
