

New Co-Op H.Q. Manchester
Full Internal Fit-Out
Bam Construction
£541'000.00

Nationwide were delighted to be appointed by Bam Construction to carry out the Joinery element of works within this iconic building in city centre Manchester for the Co-op, which would form the centrepiece of the proposed £800 million pound NOMA regeneration project that will stretch across 20 acres! 'One Angel Square' is already the winner of a clutch of design awards, and incredibly, this light and airy building achieved a world-record BREEAM score of 95.32%. This 16-storey building contains 325,000 sq. ft. of open plan office space and a large central atrium. Two basement floors include underground car parking, auditorium and fitness facilities.

Our works consisted of a standard Joinery Fit-out package which included the installation of 'Free Issue' Doors, Frames & Ironmongery sets, Architraves, Skirtings and some high level Windowboards. We also supplied and installed various banks of Acoustic Panelling as well as a number of Plex-Wood lighting Rafts. We finished off by the supply and placement of Stainless Steel and Hardwood bench seating to the external perimeter of the building.
